

# MIA Sports Technology

MIA Sports Technology are a leading supplier of technology products to the European golf industry. We provide our customers with the latest solutions from leading brand names including FlightScope® and V1 Pro backed by the highest levels of customer service and support.

We are proud to work and contribute to the commercial successes of some of the industry's leading manufacturers, retail groups, independent retailers, resorts and academies.

# FlightScope®

Master your passion

## THE WORLD'S 1ST INDOOR/OUTDOOR 3D DOPPLER TRACKING RADAR FOR GOLF

The secret of FlightScope's 3D ball tracking success lies in the patented phased array tracking technology that is used in the device. The two main technological aspects of the FlightScope® 3D motion tracking device are its military derived radar technology and its advanced industrial electronics.

### So what does this mean for you in a practical sense?

Well, it means you have access to a level of ball measurement and ball tracking that is difficult to beat.

### FlightScope® Kudu

FlightScope® Kudu is more than a Launch Monitor as it tracks the Club and Ball accurately in 3D through the use of Phased Array Doppler radar tracking technology. FlightScope® offers unmatched accuracy, and instant results in real time.

### FlightScope® Prime

The latest addition to the range, the FlightScope® Prime, provides all the performance characteristics as the Kudu with added portability. The model features an integral re-chargeable battery and connects to the computer through Bluetooth Wireless technology. FlightScope® Prime is the ultimate in portability.

### MEASURED PARAMETERS INCLUDE:

#### Ball

- Complete 3D ball trajectory
- Carry distance
- Ball speed
- Total spin and spin axis
- Shot shape
- Launch and impact angles

#### Club

- 3D club trajectory
- Impact speed and post strike speed (drivers)
- Angle of attack and club path angle
- Smash factor

# V1 PRO 2009

## BOLDER. FASTER. SMARTER.

### V1 Pro 2009 Does Everything You Expect, Only Better

V1 Pro 2009 is designed with more user options, improved features, smarter functions and added convenience so you can capture, deliver and organize your videos and lessons quicker and easier than ever before.

#### PRODUCT FEATURES:

- Faster and more powerful performance
- New and improved layout design for smarter workflow
- Built-in functionality to manipulate graphics
- Flexible video database with user friendly customization options
- Detailed at-a-glance video preview window
- New "back" button restores video to previous state
- New YouTube™ tool downloads videos directly into V1 Pro 2009
- Includes 1 year of Pro Advantage benefits

### V1 Academy

V1 created the V1 Golf Academy and V1 Sports Academy websites for V1 Pro instructors looking to deliver online lessons to students. Coaches and instructors using V1 Pro to teach golf can direct their students to the V1 Golf Academy to log-in and access their personal locker in order to view their lessons.

For those customers wanting that extra point of difference V1 can create a custom academy. Branded Academies transform your V1 Pro software and your business into a powerful digital marketing network, instantly delivering YOUR V1 lessons to your students' computers, Smartphones (iPhones, Blackberry and others) and Facebook™ pages where they can be easily shared and seen by more people than you ever thought possible.

### License Versions & Cameras

V1 Pro software is available in single, dual, four and eight camera license versions. Software is compatible with a wide range of cameras including MiniDV camcorders, hi speed cameras and the latest 300 frame per second technology including the Casio Exlim EX-F1.

CASIO

## PERFORMANCE STUDIO DESIGN

MIA Sports Technology are committed to ensuring that the products and services we supply positively add value to the customer and their commercial success. A major service we offer is the design and installation of performance studios that provide a state of the art custom fit/teaching environment

### Design and Planning

We offer a full design consultation service during the early planning stages of the studio to ensure the finished result is an efficient, functional and easy to use facility. We advise on surfaces, nets, lighting, cable management and the IT infrastructure.

**“The investment in our teaching and custom fit studio, which features a FlightScope® Kudu tracking radar, has literally doubled our sales of equipment.”**

Paul Johnson, PGA Professional, Hagley Golf & Country Club

### Installation and Training

The installation process brings the studio to life. Our specialist team deliver and install all equipment, each configuration is fully pre tested before installation.

### Ongoing Support

When the project is complete MIA Sports Technology continue to provide ongoing technical support ensuring you studio performs at optimum level. This service level is a major part of our relationship with the customer.
